The Fund is designed to mirror closely the performance of the Target Fund and will not be adopting any temporary defensive position in response to events such as adverse market or economic conditions.

KEY RISKS

5. What Are The Key Risks Associated With This Product?

The following are the risks associated with the **Fund**:

Target Fund risk

Unitholders of the Fund should be aware that the price of the units of the Target Fund can go down as well as up and past performance of the Target Fund is not necessarily a guide to the future performance of the Target Fund. Investments in the Target Fund are meant to produce returns over the period of the time and are not suitable for speculation in the short term.

The performance of the Target Fund may be affected by changes in the market value of the assets comprised in the portfolio which are subject to changes in interest rates, foreign exchange, economic and political conditions.

As the Fund invest primarily in the Target Fund, the Unitholder(s) are indirectly exposed to the risks associated with the Target Fund. There is a possibility where Unitholder(s) may not get back their original investment.

Target Fund	Specific risk
BOS International Fund - Asia Equities	<ul style="list-style-type: none"> • Particular risks associated with equity funds; • Particular risks associated with emerging markets; • Foreign-currency risk; • OTC financial derivative instruments.

The Fund is designed to mirror closely the performance of the Target Fund. The Fund adopts a passive strategy, where it invests a minimum of 95% of its NAV into the Target Fund at all times and will not be adopting any temporary defensive position in response to events such as adverse market or economic conditions. As such, the Fund is exposed to the potential risk of the Target Fund's non-performance.

Notwithstanding the above, the Manager will manage the Fund's currency hedging activity in respect to the relevant Classes of units of the Fund to mitigate the currency risk of the Fund.

Currency risk

As the investments of the Fund principally consist of the Target Fund's share class(es) (which are denominated in USD), the fluctuation in the exchange rate between (a)USD; and (b)currency in which the Class of units that you invested in, may have an impact on your investment in the Fund. Take for example, if your investments in the Fund consist of Class of units denominated in MYR, the weakening of USD against MYR will negatively impact your investment in MYR term.

As the Fund is established as multi-class funds, the Fund may in any future dates offer Class(es) denominated in other foreign currencies. Such Class(es) is also exposed to same currency risk as described above.

To mitigate the currency risk, the Fund will utilise derivative instruments for hedging purposes in relation to the relevant Class(es). Take for example, for Class MYR-Hedged BOS, the Fund will employ derivative instruments to hedge against the potential weakening of the USD (in respect to MYR).

Currency hedging involves additional transactional cost, which will be reflected in your investment. Besides, currency hedging may also prevent you from enjoying any up-side due to currency fluctuation.

As currency hedging will be carried out by the Manager on the best-effort basis. Thus, currency risk cannot be 100% eliminated.

It is also important to note that the Target Fund which invests globally and their assets consists of investments denominated in various currencies. As such, the Target Fund is also exposed to currency risk. You are advised to read the foreign currency risk of the Target Fund as disclosed in section 4.3 below.

Country risk

As the Fund invests in the Target Fund which is domiciled in Luxembourg, the Fund's investments in the Target Fund may be affected by risks specific to Luxembourg. Such risk includes adverse changes in Luxembourg's economic fundamentals, social and political stability, laws and regulations and foreign investments policies. These factors may pose an adverse impact on the Target Fund Investment Manager's duty to manage the Target Fund's investments, which may potentially depress the Target Fund's net asset value growth, and consequently depress the Fund's NAV growth.

Liquidity risk

As the Fund principally invests in the Target Fund (which is non-listed collective investment schemes), the Fund's ability to fulfil its obligation (e.g. redemption request by the Unitholders) may be subject to the Target Fund's ability to facilitate redemption requested by the Fund in a timely manner, especially if the Fund is short of cash to facilitate redemption and need to liquidate its holdings in the Target Fund to fulfil its obligation.

By default, to mitigate the risk, the Fund will keep up to 5% of NAV in liquid assets. With the concurrence of the Trustee, the Fund may even hold more than 5% of liquid assets to meet redemption requests, especially when high volume of redemption requests is anticipated.

Note: It is important to note that the suspension or deferment of redemption (if any) by the Target Fund may also impact the Fund's ability to meet redemption request from the Unitholder on a timely manner.

The investment manager exercises diligence in minimising the above risks to the Fund. However, it is not always possible to cover all investment risks in spite of best efforts as financial markets can be highly unpredictable. Investors are encouraged to consult their advisers such as financial/tax consultants, lawyers or bankers for a further understanding of these risks.
